

Click and Collect Pre-ordering Solution

“In this next chapter, our purpose very much endures - to enable the best food, and the best cost savings, with the best support.”

- **Oliver Hall, Managing Director**

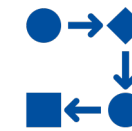

We can now help provide you with the ultimate tool to enable **social distancing**. Reduce risk through **online ordering and pre-payment** to achieve greater convenience and **safety for your diners and your catering team**.

This easy to use and easy to implement solution allows diners to simply view the menu, order their food and drink and pick it up or request a delivery time with **no need for direct interaction**. Collection and delivery slots are allocated at the time of order and these are capped to **manage social distancing**. The diner receives alerts and updates via text or email. This results in improving the safety for both the diner and the food service team.

Features include:

Secure payment

Food production consolidation

Diner alerts & messages

Multiple collection points

Different menu options

Share offers & promotions

Support during Covid-19

Whether its advice around compliance and operational considerations, benchmarking and optimising your food costs, sourcing PPE and cleaning products, implementing click and collect solutions, providing regular updates and access to useful resources or supplying practical guides for reopening – allmanhall are here to help.
